1200x900	\$220	\$288	\$320	\$404

MATS AND GLASS

Mats or borders are used to not only enhance art but to protect work from adhering to glass.

Thus destroying or altering art if glass or moisture press onto the art or photo etc.

These are available in many colours, styles, textures and ph content with everyday usage up to archival and museum conservation quality.

Glass spacers are used when no mat is required, glass can be kept off picture using a clear glass spacer that is not seen.

Glazing

1. Clear glass -image clarity
 -no ultra violet filtering
2. Non reflective-etched surface, creating light diffusion and minimizes reflection
3. 97%uv FREE -uv can be harmful to art, causing fading and embrittlement

SOUTHERN PICTURE FRAMERS

-this glass filter 97% of uv rays

4.Perspex -for protection from impact or when glass is a danger or weight is an issue.

POSTER SELECTIONS
